

# SIMPLY THAT BIT BETTER.

## YOUR PARTNER FOR COMPRESSED AIR TECHNOLOGY AND PNEUMATICS.

No matter what requirements your compressed air system and pneumatic application have, our experts will find the solutions.

Are you looking for high-performance products, customized technical solutions, specific sales promotion measures, or personalized eCommerce services? We can help you with those. At RIEGLER, customer orientation turns into customer understanding. We want to see the world through your eyes. Because only when we are very close to our customers and understand their challenges can we offer the truly perfect solution.

We see it this way: You can learn a trade or study a science. But true mastery comes with the ability to apply what you've learned, combine skills and solve problems proactively. In short, it's about „Doing. Simply. Better.“ And that's exactly what RIEGLER stands for.

## OUR VALUES

We operate from a place of conviction. And in line with our values. Doers don't need to do too much talking. Hence, our guiding principle sums up the RIEGLER company philosophy in just a few words: SIMPLY THAT BIT BETTER.

### SIMPLY.

# 1.

We approach our customers with the goal of always finding the perfect solution for them. To put it simply: we get it right.

### THAT BIT.

# 2.

The added value we bring: For us, good is not good enough. We want to inspire and simply to keep improving quality.

### BETTER.

We have a tradition of getting things done: While others are still talking, we get stuck in – we can't go about it any other way. And that's just how it should be.

# 3.

## WHAT WE DO, WE DO RIGHT.

## STANDING STILL? NOT OUR THING.

SUCCESS CAN BE MEASURED.  
THE WORLD OF RIEGLER IN FIGURES.

# PERFECTION MEANS LEAVING NOTHING TO CHANCE.

## WE ALWAYS GIVE 100 %. THAT ALSO GOES FOR OUR CLIMATE PROTECTION.

Since 2019, RIEGLER & Co. KG has been having its total carbon emissions professionally audited by ClimatePartner GmbH. This corporate carbon footprint forms the basis for our five steps of climate protection. We set reduction targets and translate these into specific measures in order to save as many emissions as possible through our own efforts or, ideally, to avoid them altogether.

With the "ClimatePartner-certified" label, we are now communicating our commitment to climate protection with even more transparency and credibility.

We have publicly set ourselves the following CO<sub>2</sub> reduction targets for 2030:

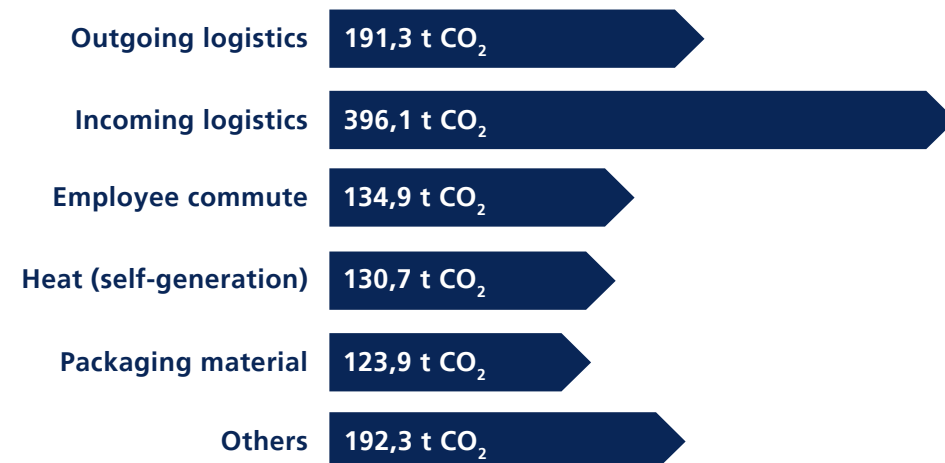

### SCOPE 1 and 2: 6 % reduction of CO<sub>2</sub> emissions

- 100 % green electricity
- Expansion of electromobility

### SCOPE 3: 25 % reduction of CO<sub>2</sub> emissions

- Efficiency gains in intralogistics – savings on packaging materials
- Reduction in paper consumption – digitization of print products, reminders, payroll accounting, etc.
- Disposal – 100 % recycling of waste
- Green IT – extension of device lifecycles
- and much more.

## OUR CARBON FOOTPRINT.

### LOGISTICS – INCOMING

Rethinking global freight transport to reduce emissions.

### FLIGHTS

Train travel instead of flights or private vehicles. Use of online meetings.

### PACKAGING

Saving or reusing packaging, especially RESY cardboard boxes.

### EMPLOYEE COMMUTE

Home office and bicycle leasing for sustainable mobility.

### POWER, WATER, HEAT

100 % green electricity, green IT, infrared heaters, and LED lighting.

### WASTE DISPOSAL

100 % recycling with AV Möck, an active member of the WIN Charter.

### SUSTAINABLE VEHICLE FLEET

We plan to convert our vehicle fleet to electric drives.

### AVOIDING PAPER

We are increasingly switching to paperless and use only recycled papers with low grammage. Shipping is carbon-offset via "GoGreen".

### SUSTAINABLE OUTGOING LOGISTICS

Environmentally conscious shipping of our packages via GLS KlimaProtect.

### AVOIDING IS BETTER. OFFSETTING IS LOGICAL.

We offset unavoidable CO<sub>2</sub> emissions by supporting sustainable projects.

- Renewable energies in Asia, continent-wide.  
Annual volume: 227,519 t CO<sub>2</sub>
- Water filter + solar lights (MEC) in India.  
Annual volume: 227,519 t CO<sub>2</sub>

### NATURALLY. DOING. MORE.

In addition to economic growth, we encourage sustainable local development. We use Dopfer drinking bottles made from recycled ocean plastic, glass bottles instead of disposable ones, and fully automated coffee machines instead of coffee pods. We also house bee colonies and donate to NABU, the Nature and Biodiversity Conservation Union, in lieu of Christmas gifts.

**"As an entrepreneur, owner and as human being, it is a matter close to my heart not to leave a negative impact through our carbon footprint."**

Philipp Wacker, Managing Partner of RIEGLER & Co. KG.

More info

**YOUR GOAL  
IS OUR GOAL.  
WE CALL  
THAT PARITY.**

**WITH US, YOU'LL FIND  
THE RIGHT PRODUCTS  
AND ADDED VALUE TO  
OPTIMALLY MEET YOUR  
MARKET REQUIREMENTS.**

#### SECTOR-SPECIFIC TRADE

We supply all kinds of professionals in the industries below:

- Compressed air/pneumatics
- Fluid/hydraulics
- DIN/standard parts
- Tool dealers
- Spraying and painting technology
- Car/vehicle trade
- Building materials trade/building and DIY stores
- Electrical wholesale
- Sanitary/heating/air conditioning
- Chemical and pharmaceutical trade

#### Your added value:

- Fast availability of spare parts
- Broad range, including for special applications
- Special parts available on request
- Personal contact person on site
- Technical expertise
- Professional technical support
- Extensive eBusiness offering

We are proud to look back over many years of offering you a comprehensive range of high-quality products and solutions tailored specifically to the requirements of the retail sector. Be it for sector-specific, technical, or online trade – we have the right products and added value to optimally serve your market requirements.

#### ONLINE TRADE

For one of the fastest growing sales markets, we offer the right solutions for individualization and process handling, tailored to your needs.

#### Your added value:

- Shipping guaranteed for orders received by 5 p.m.
- Automated transfer of receipts
- Individual EDI and OCI integration as well as BMEcat, CSV, and XLS/XLSX item data
- High level of content provision
- Broad availability of product data (also available via the online shop): item data, data sheets, CAD data, operating instructions
- Support with sales campaigns
- Optimization of the process chain

#### TECHNICAL TRADE AND ASSOCIATIONS

For decades, we have stood out as the preferred compressed air technology and pneumatics partner for the industrial trade and technical wholesale sectors. This is also reflected in our many years of cooperation with associations.

#### Your added value:

- Optimal conditions through volume bundling
- Wide range of training courses
- Sales support
- Sales room design and trade fair equipment
- Extensive range of master data
- Suitable eBusiness solutions

More info

# FOR YOU WE MAKE IT UNIQUE.

**NO MATTER IN WHAT FIELD YOU WORK, THE BEST SOLUTION IS THE ONE THAT PERFECTLY SUITS YOU.**

Find out which industry-specific options RIEGLER can offer you, regardless of whether you're interested in an individual sector solution or series pneumatics products.

## COMMERCIAL VEHICLE MANUFACTURING

Compressed air technology and pneumatic products play an important role in commercial vehicle construction, helping to improve the safety, efficiency, and performance of the vehicles. We develop the right compressed air or pneumatic solution for your application.

### Examples of RIEGLER solutions:

- Electropneumatic controls
- Tamper-proof control boxes
- Maintenance units for antifreeze
- Air distribution fittings
- Valve terminals
- Pneumatic actuators for base valves

## PLANT ENGINEERING

Compressed air is versatile and offers an efficient way to control movements and processes in industrial systems. Examples include transmitting energy, controlling processes, cleaning systems, and actuating pneumatic components such as valves and cylinders.

### Examples of RIEGLER solutions:

- Air distributors for recycling plants
- Expansion stations for nitrogen systems
- Control units for air motors in curved screen systems
- Control units for gas extinguishing systems as VDS-certified control cabinets
- Switch cabinets, including safety components
- Switch cabinets for mobile systems

## MACHINE CONSTRUCTION

Pneumatics in mechanical engineering offer an efficient, reliable, and versatile way of implementing mechanical movements and automation processes.

Discover the advantages of our wide range of compressed air and pneumatic components, which offer you the flexibility to realize innovative machine concepts and reduce costs at the same time.

### Examples of RIEGLER solutions:

- Pneumatic drives
- Clamping cylinders/construction parts
- ATEX actuation units, slide valves

## DOSING AND LUBRICATION TECHNOLOGY

Precise dosing of lubricants and other fluids is a top priority in the dosing and lubrication technology industry. From micro-dosing to high-pressure applications – we offer you the solution you need to take your designs to the next level.

In many industrial processes, it is necessary to dispense certain liquids or pastes in precise quantities. Compressed air is used to convey these materials with the aid of valves or nozzles and dispense them in the desired quantity.

### Examples of RIEGLER solutions:

- Pneumatic control cabinets
- Electropneumatic controls

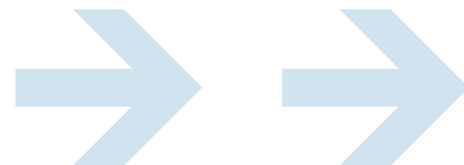

**THERE ARE TRADERS,  
THERE ARE  
MANUFACTURERS,  
AND THERE'S RIEGLER.**

At RIEGLER, services are not merely an add-on. Alongside our broad range and the diversity of our products, they are at the heart of what we do. We have geared our services towards increasing the performance of your company and working with you to ensure a successful future.

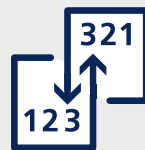

**WE DON'T HAVE  
THE ANSWER  
TO EVERY QUESTION,  
BUT WE'LL HAVE  
ONE FOR YOURS.**

Find out more about how our services can help you overcome your challenges and achieve your goals.

We place great emphasis on personal contact with you. Don't hesitate to arrange an appointment with us directly.

## CAN-DO SERVICES

With us, customer orientation becomes customer understanding. Our can-do services aim to help you overcome challenges and achieve your goals.

- Individual personal support and advice – chat, telephone, e-mail, or directly at your premises
- Supplier bundling
- Item recoding
- Seminars on technology and application
- Individual solutions
- Sales support
- Item change management
- Product selection help

## TECHNICAL SERVICES

Here, we support you with a variety of technical services so that you can find a solution or have exactly the right product in your hands as quickly and easily as possible.

- Engineering, planning, and construction of individual assembly modules
- Ready-to-install pneumatics up to certified pneumatic control cabinets
- Cylinder service
- CAD development: project planning, modeling, rendering, animations
- Sample and prototype construction, plus 3D prototyping
- Documentation

## DIGITAL SERVICES

Optimize your processes with our digital solutions and benefit from our high-quality item data and product information.

- Online shop
- Partner online shops
- Interface solutions
- Item data
- Digital receipts
- Application videos and webisodes
- Scanner solutions
- Download product and other information

## LOGISTICS SERVICES

Increase your company's productivity with our comprehensive range of logistics services. Benefit from the fast delivery process, neutral shipping, or individual product sets for your needs.

- Same-day shipping
- Express delivery
- Free delivery from EUR 75 for orders from the online shop
- Neutral shipping
- Set and kit provision according to your wishes
- Delivery status visible online at any time

THE RIEGLER PRODUCT RANGE

TREATMENT  
AND REGULATION

FINE-TUNING  
YOUR COM-  
PRESSED AIR.

- Pressure regulators
- Filters
- Filter regulators
- Lubricators
- Service systems multi-part
- System extensions
- Condensate drain
- Oil water separators
- Flange pressure controller
- Proportional control valves
- Accessories and spare parts

PRESSURE AND TEMPERATURE  
MEASUREMENT

WHEN YOU  
WANT TO BE  
BANG ON  
TARGET.

- Bourdon tube pressure gauges
- Capsule-type pressure gauges
- Diaphragm pressure gauges
- Digital pressure gauges and display units
- Accessories for pressure gauges
- Pressure switches
- Pressure transmitters
- Flowmeters
- Hand-held measurement units
- Handheld tyre gauges
- Leak detectors
- Thermometers and thermowells

INDUSTRIAL VALVES AND  
MEDIA VALVES

A TIGHT HOLD.  
EVEN UNDER  
PRESSURE.

- Ball valves
- Shut-off devices
- Solenoid valves
- Safety valves
- Pressure limiting valves
- Butterfly valves
- Automated shut-off units
- Check valves
- Dirt strainer
- Spare parts

PNEUMATIC CYLINDERS  
AND CONTROL VALVES

LOST THE DRIVE?  
WE'RE BEHIND  
YOU.

- Pneumatic cylinders according to standard
- Pneumatic cylinders without standard
- Rodless cylinders
- Fixing parts and accessories
- Air-air pressure multipliers (boosters)
- Way valves
- Valve terminals
- Logic elements
- Two-hand safety control valves
- Check valves and current valves

HOSE COUPLINGS

FIRM.  
FASTER.  
FIXED.

- Quick-connect couplings
- Safety couplings
- Non-interchangeable quick-lock couplings
- Plug-in connectors and nipples
- Hydraulic couplings
- Claw couplings
- Temperature control couplings
- GEKA couplings and accessories
- KAMLOK hose couplings and accessories
- Storz couplings and accessories

NOISE DAMPING, THREADED FITTINGS,  
AND LINE CONNECTORS

IT DOESN'T  
GET TIGHTER  
THAN THIS.

- Silencers and hearing protection
- Double threaded, reducing, and pipe double nipples
- Caps and screw plugs
- Extensions and fittings
- Counter nuts and bulkhead fittings
- Steel and malleable iron cast fittings
- Assortment boxes
- Push-in fittings
- Screws fittings
- Tube connectors
- Bite-type tube fittings
- Screw-in and screw-on connectors
- Hose connectors and pivoting bushings

COMPRESSED AIR GUNS,  
PIPES AND HOSES

ALL THE  
TRIMMINGS.

- Blow guns
- Nozzles and accessories
- Spray guns
- Air and fluid guns
- Hoses
- Pipes and pipe connectors
- Hose reels
- Receptacle combinations
- Hose clamps and clips
- Cable ties

OFFICIAL PREMIUM PARTNERSHIP

A powerpack of added  
value for you.

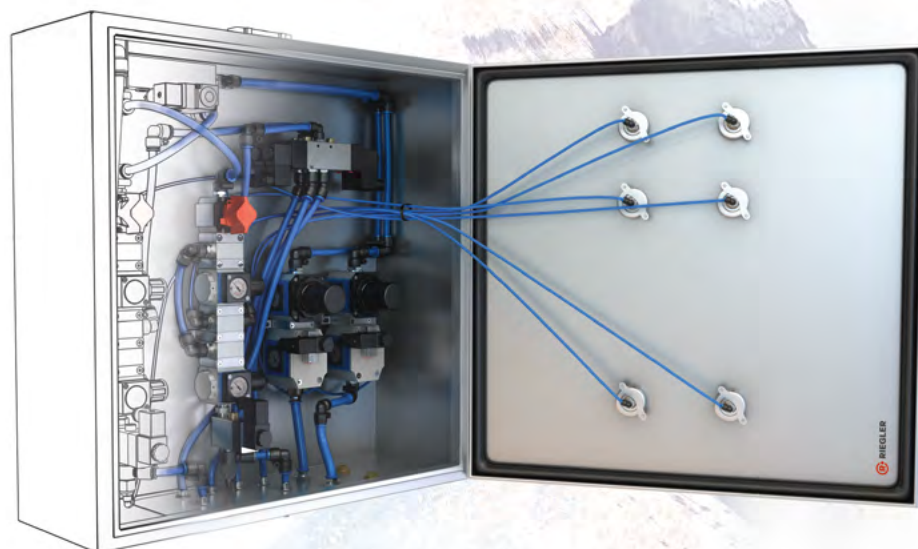

As a premium partner of RIEGLER, you get access  
to the full range of Metal Work products.

- ➔ You have access to the entire Metal Work range through RIEGLER
- ➔ Qualified technical advice and innovative application know-how
- ➔ Professional design of your individual pneumatic solution
- ➔ Straightforward spare parts procurement of Metal Work products worldwide
- ➔ Fast and reliable delivery

# THERE IS ALWAYS A SOLUTION – NAMELY THE RIGHT ONE.

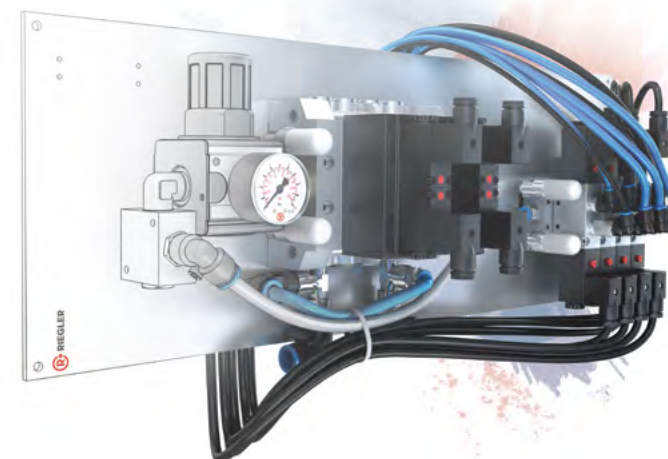

The best solution is the one that perfectly suits you. In our technical center we develop and produce individual products and complete system solutions for all areas of fluid technology – starting from a quantity of one. In doing so, we make use of standardized parts wherever possible. Our expertise, a broad product range, and extensive warehouse stocks save you time and costs.

Where there is no solution, we create one. Our experts support you from engineering and prototype construction to operating instructions for the finished part – all from a single source and with the support of your direct contact person. After all, there's one thing you can be sure of: We truly love working with fluid technology.

## OUR SERVICES

- Engineering, planning, and construction of individual assembly modules
- Economically designed system solutions
- Ready-to-install pneumatics up to certified pneumatic control cabinets
- CAD development: project planning, modeling, rendering, animations
- Sample and prototype construction, plus 3D prototyping
- Customized cylinder solutions
- Standard pneumatic cylinders according to ISO 15552 in special lengths with very short lead times – express cylinder service
- Product-specific services
- Technical advice
- On-site advice and service
- Services in logistics and security
- QS-tested quality

**INDIVIDUAL.  
FAST.  
FLEXIBLE.**

## DEVELOPMENT AND CONSTRUCTION

Every requirement is unique, which is why our development and design department specializes in realizing a tailor-made solution that fits your application exactly. These solutions are not only technically sophisticated, but also economically efficient. From the initial idea to the finished product, we realize all projects for you in CAD.

## THE RIEGLER CYLINDER SERVICE

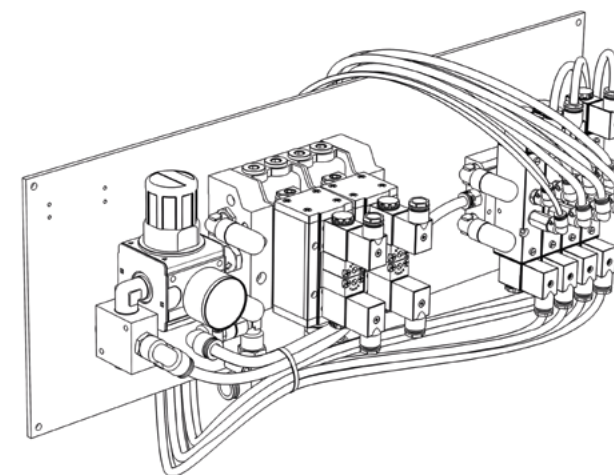

**48-HOUR  
EXPRESS SERVICE**

**INDIVIDUAL  
SOLUTIONS**

You need a replacement cylinder, a sample cylinder, or a small-batch series at short notice? We can make it possible for you – and tailor it exactly to your needs.

Take advantage of our 48-hour express service for orders received by 12 noon. Standard delivery time is three to four working days.

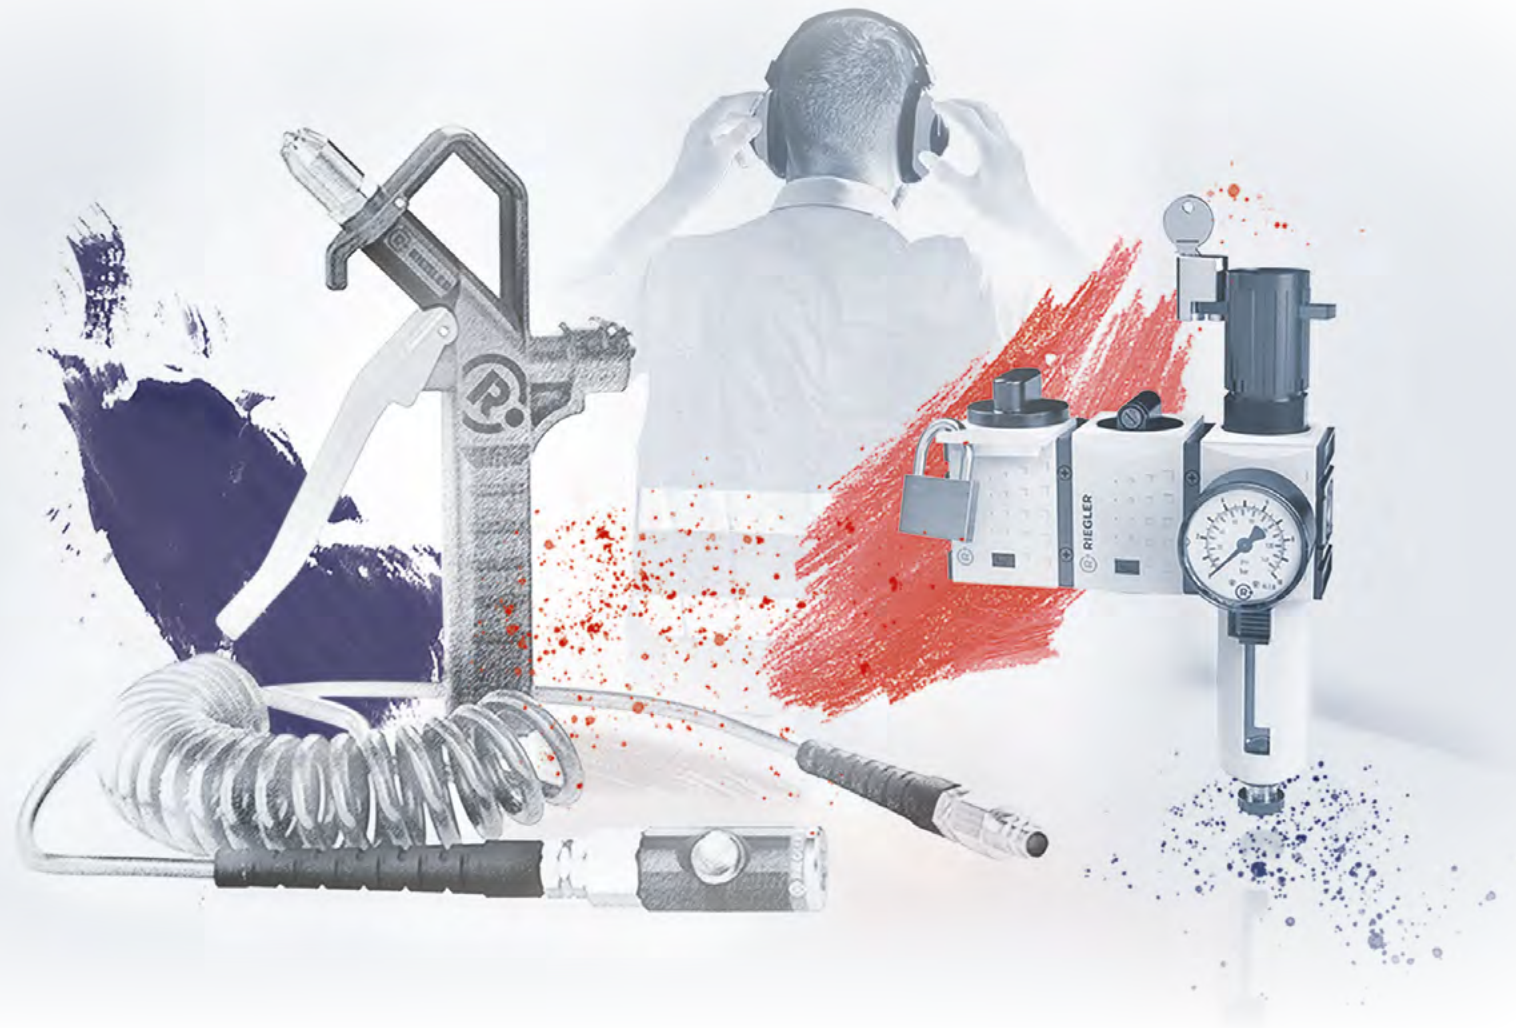

More info

## RIEGLER SAFETY

**BETTER  
MEANS  
SAFER.**

### SAFETY AND ENERGY EFFICIENCY IN COMPRESSED AIR TECHNOLOGY

With our RIEGLER SAFETY product range, you can make your compressed air applications safer and more efficient – and therefore even better. Of the almost 800,000 accidents at work reported in Germany every year, around 10 % can be attributed to compressed air. This relatively high number can undoubtedly be explained by the fact that compressed air, almost like electrical current, is used in virtually every production facility and workshop.

Don't let an accident happen in the first place – focus on safety and energy efficiency with products from RIEGLER's SAFETY range.

**80,000**  
ACCIDENTS AT WORK PER YEAR

**Approx. 10 %**  
OF ALL ACCIDENTS AT WORK ARE  
CAUSED BY COMPRESSED AIR.

## RIEGLER SAFETY AT A GLANCE:

- Components for accident prevention and safety at work
- Safe and healthy at work
- Products required by law in accordance with currently applicable legislation, standards, directives, and regulations
- Energy-efficient components
- Reduction of accidents at work and increasing occupational safety
- Expansion of competence in the field of compressed air technology

### PARTICULARLY COMMON HAZARDS IN THE HANDLING OF COMPRESSED AIR:

- Hearing damage due to noise caused by exhaust air from blowguns, hose couplings, and/or valves
- The so-called whiplash effect, i.e. kickbacks occurring during separation of single-stage coupling systems
- Separation of coupling systems generates an exhaust air noise that is not insignificant
- Hoses lying around on the floor become a daily tripping hazard
- Bursting hose lines and pressure vessels have very high risk potential
- Life-threatening embolisms can be the result of compressed air or foreign bodies penetrating open areas of skin or wounds

# YOU CAN JUST DO IT. OR YOU CAN KEEP DOING IT BETTER.

See, hear, feel, do – and return home with added value. As your dynamic partner, we bring you up to date with the latest knowledge. We provide you with regular training in compressed air technology and pneumatics.

At the RIEGLER Academy, we combine theoretical principles with practical exercises directly at the relevant workstations. You can even get up close to complex pneumatic control systems, and then build on these solid foundations to bring your full potential to bear.

## SEMINARS ON SITE

### BASICS OF COMPRESSED AIR TECHNOLOGY

Are you just coming into contact with compressed air technology products? Or have you been familiar with compressed air and the associated products for some time, but are keen to expand or refresh your knowledge of the four phases of compressed air? We have the solution for you: our one-day seminar on "Fundamentals of compressed air technology".

### BASICS OF PNEUMATICS

Do you already have experience with compressed air technology and would like to supplement or expand this? Make our one-day "Fundamentals of pneumatics" seminar your next step. In this seminar, we look at the variants and types of different pneumatic cylinders and the function of control valves. In the subsequent practical phase, we will build the previously discussed circuits.

### RIEGLER SAFETY

Are you familiar with handling compressed air or have you perhaps just come into contact with it? Then you have no doubt already discovered that compressed air can be dangerous. It makes sense to prevent these dangers from arising in the first place. Our "RIEGLER SAFETY" one-day seminar will teach you how to recognize and avoid the dangers associated with compressed air. You will also learn valuable information about the energy-saving use of compressed air products.

### SALES EXCELLENCE

You may have noticed that sales have changed in recent years. The fact is that we all have to adapt to new market situations. We are delighted to offer our one-day "SALES EXCELLENCE" seminar, where you learn all about appropriate communication techniques.

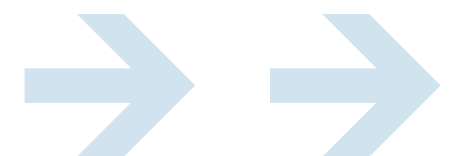

The crucial thing for you is that we respond individually to your wishes and expectations so that you can achieve measurable success.

### DIGITAL SEMINAR OFFER

We are happy to offer you parts of our seminar program in digital form. Don't hesitate to get in touch so that we can work out which topics are important to you.

# ELECTRONIC.

# FAST.

# SAFE.

## eBUSINESS

To ensure that your orders are processed cleanly and without manual intervention, we believe it is important to digitize our processes. The comprehensive eBusiness portfolio accompanies you through the entire ordering process: from the selection of your products in the online shop to electronic order processing, EDI, and digital receipts, RIEGLER offers the right eSolutions for your application. Regardless of the application, you benefit from a fast ordering and delivery process, good data quality, and an optimized logistics chain.

### EDI (ELECTRONIC DATA INTERCHANGE)

Our EDI solutions simplify data exchange between you and RIEGLER. This efficient technology optimizes your business processes and reduces costs.

#### THE ADVANTAGES FOR YOU

Electronic data exchange between companies saves process costs:

- Automated transfer of receipts
- No duplication
- Faster business processes
- Minimized error rate
- 24/7 accessibility
- Paper documents obsolete
- Simplified communication

### OCI (OPEN CATALOG INTERFACE)

With our OCI solution, you can simplify your purchasing process in the long term and always have access to the latest RIEGLER product information.

#### THE ADVANTAGES FOR YOU

- Your purchasing department can work quickly and efficiently.
- The product catalog is always up to date.
- The actual order completion still takes place in your system.

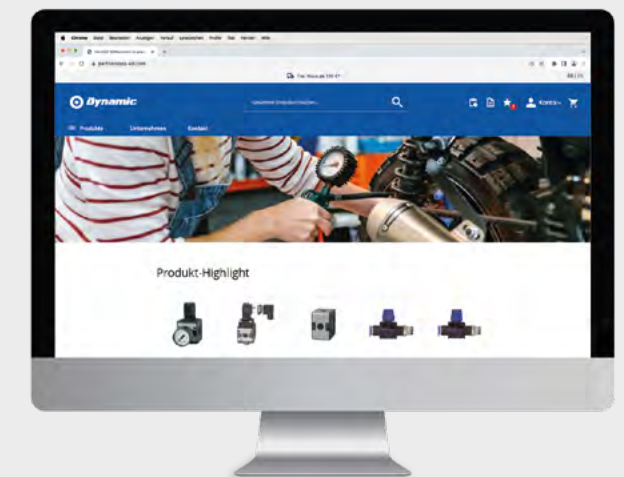

### ITEM DATA

Be they Excel files or BMEcats, we are happy to provide you with our item master data in various forms and complete with the common classification systems

- ECLASS
- UNSPSC®

## RIEGLER PARTNER SHOPS

We offer our customers an independent shop system with multiple beneficial functions – adapted to your corporate design. The range of functions extends from real-time availability displays, the option to set individual discounts, and the statistics function through to quick item entry and article search with selected competitor item numbers. Get in touch with us – we'll be happy to help you.

#### THE WAY TO THE RIEGLER PARTNER SHOP

1. Get in touch with your direct contact person in our sales department.
2. Web session together with our eBusiness specialists
3. Set-up of the online shop in line with your configuration
4. Joint approval of the finished online shop
5. Training for your administrators
6. Go-live
