

Cleaner M

Art. No. 144889

Type No. RMOK5

Exemplary illustration

Cleans and degreases all metals, plastics, rubber, glass, ceramics, wood or painted and coated surfaces. Powerfully and specifically dissolves grease, oil, resin, soot, wax, release agents, forming substances, cooling lubricants as well as label and adhesive residues.

Technical data

Colour	colourless, transparent
Description	Cleaner M, 5 l
Density	0,98 g/cm ³
Flash point	40 °C
PH value	10.8
Storage life	12 months

Commercial data

Customs tariff number	34029090
Country of origin	DE
eCl@ss 5.1.4	30021609
eCl@ss 9.0	30021609
UNSPSC_Code_v190501	47131825
UNSPSC_CodeDesc_v190501	Contact surface cleaners

Product information

Cleaner M is ready to use, fast-drying, non-flammable and classified as non-hazardous. The cleaner is easy and safe to use. It can be used, for example, to clean and degrease machine components during maintenance works and tools.

Its special formula consisting of special surfactants and alcohols does not contain any silicone defoamers, is non-greasy and therefore contributes significantly to the process-safe cleaning of components in production processes.

Applications

- removes soilings caused by cooling lubricants, drawing and cooling oils
- cleans and degreases machine components and tools
- removes residues of resin, release agents and many other soilings
- for pre-treating components, if a greasy surface would impact their performance

Processing

Spray Cleaner M generously onto the surfaces to be cleaned. Allow to take effect, wipe off with a clean, lint-free cloth or fleece. Done. In case of stubborn dirt, a longer reaction time might be required. Repeat, if necessary. The material compatibility should be checked beforehand in a concealed area for safety reasons.

Storage

Container is pressurised. Protect from sunlight and temperatures above +50°C.

Safety and health

When processing RIEGLER products, the physical, safety, toxicological and ecological data and regulations in our EC safety data sheets (www.RIEGLER.de) must be observed.
