## 

## Applications

■ Control and regulation of processes

- Monitoring of plants and switching of circuits
- For gaseous and liquid aggressive media that are not highly viscous or crystallising, also in aggressive environments
■ Chemical industry, petrochemical industry, power plants, mining, on-/offshore, environmental technology, machine building and general plant construction

## Special features

■ Up to 4 switch contacts per instrument

- Also available with case filling for high dynamic pressure loads or vibrations
- Instruments with inductive contacts for use in hazardous areas
■ Instruments with contacts for PLC applications
- Instruments optionally available in safety version S3 per EN 837

## Description

Wherever the process pressure has to be indicated locally and, at the same time, circuits need to be switched, the model PGS23.1x0 switchGAUGE finds its use.

Switch contacts (electrical switch contacts) make or break an electric control circuit dependent upon the pointer position of the indicating measuring instrument. The switch contacts are adjustable over the full extent of the scale range (see DIN 16085), and are mounted predominantly below the dial, though also partly on top of the dial. The instrument pointer (actual value pointer) moves freely across the entire scale range, independent of the setting.
The set pointer can be adjusted using a removable adjustment key in the window.

Model PGS23.100 with switch contact

Switch contacts consisting of several contacts can also be set to a single set point. Contact actuation is made when the actual value pointer travels beyond or below the desired set point.

The pressure gauge is manufactured in accordance with DIN 16085 and fulfils all requirements of the relevant standards (EN 837-1) and regulations for the on-site display of the working pressure of pressure vessels.

As switch contacts, magnetic snap-action contacts, reed switches, inductive contacts and electronic contacts are available. Inductive contacts can be used in hazardous areas. For triggering programmable logic controllers (PLC), electronic contacts and reed switches can be used.

## Specifications

## Models PGS23.100 and PGS23.160

| Nominal size in mm | $\square$ |
| :--- | :--- |
| Accuracy class | 1.0 |
| Scale ranges | 0 |

100
160 on request
1.0

0 ... 0.6 bar [0 ... 8.7 psi] to 0 ... 1,600 bar [0 ... 23,206 psi] other units (e.g. psi, kPa) available or all other equivalent vacuum or combined pressure and vacuum ranges

Single scale
Option:
Dual scale

Full scale value
0.9 x full scale value
1.3 x full scale value

- Lower mount (radial)
- Lower back mount
- $G 1 / 2 B$
- $\mathrm{G}_{1 / 4} \mathrm{~B}$
- G $3 / 8 B$
- $1 / 2$ NPT
- M20 x 1.5
others on request
$+200^{\circ} \mathrm{C}\left[+392^{\circ} \mathrm{F}\right]$ max. with unfilled instruments
$+100^{\circ} \mathrm{C}\left[+212^{\circ} \mathrm{F}\right]$ max. with filled instruments
$-20 \ldots+60^{\circ} \mathrm{C}\left[-4 \ldots 140^{\circ} \mathrm{F}\right]$
When the temperature of the measuring system deviates from the reference temperature $\left(+20^{\circ} \mathrm{C}\right)$ : max. $\pm 0.4 \% / 10 \mathrm{~K}$ of full scale value

## Case

Case filling
Wetted materials
Process connection, pressure element
Non-wetted materials
Case, movement, bayonet ring
Dial
Instrument pointer
Set pointer
Window
Ingress protection per IEC/EN 60529

|  | Option: |
| :--- | :--- | :--- |
|  | IP66 |

## Electrical connection

- Version S1 per EN 837: With blow-out device in case back - Safety version S3 per EN837: With solid baffle wall (Solidfront) and blow-out back

Without
Option:
With case filling

Stainless steel 316L, option: Monel (model PGS26)

Stainless steel
Aluminium, white, black lettering
Aluminium, black
Aluminium, red
Laminated safety glass
IP65 ${ }^{2)}$
Oplion:
Cable socket PA 6, black
Per VDE 0110 insulation group C/250 V
Cable gland M20 x 1.5
Strain relief
6 screw terminals + PE for conductor cross-section $2.5 \mathrm{~mm}^{2}$
For dimensions see page 9
others on request

[^0]
## Switch contacts

Magnetic snap-action contact model 821

- No control unit and no power supply required
- Direct switching up to $250 \mathrm{~V}, 1 \mathrm{~A}$

■ Up to 4 switch contacts per measuring instrument

## Inductive contact model 831

- Suitable for use in hazardous areas with corresponding control unit (model 904.xx)
- Long service life due to non-contact sensor
- Low influence on the indication accuracy
- Fail-safe switching at high switching frequency
- Insensitive to corrosion
- Also available in safety version
- Up to 3 switch contacts per measuring instrument

## Electronic contact model 830 E

- For direct triggering of a programmable logic controller (PLC)
- 2-wire system (option: 3-wire system)
- Long service life due to non-contact sensor
- Low influence on the indication accuracy
- Fail-safe switching at high switching frequency
- Insensitive to corrosion
- Up to 3 switch contacts per measuring instrument

## Reed switch model 851

- No control unit and no power supply required
- Direct switching up to $250 \mathrm{~V}, 1 \mathrm{~A}$

■ For direct triggering of a programmable logic controller (PLC)

- Free from wear as without contact
- NS 100: Maximum two change-over contacts per measuring instrument
- NS 160: Maximum one change-over contact per measuring instrument (switching voltages $\mathrm{AC}<50 \mathrm{~V}$ and $\mathrm{DC}<75 \mathrm{~V}$, switch contact not adjustable from outside)

## Switching function

The switching function of the switch is indicated by index 1 , 2 or 3.
Model 8xx.1: Normally open (clockwise pointer motion)
Model 8xx.2: Normally closed (clockwise pointer motion)
Models 821.3 Change-over; one contact breaks and one and 851.3: contact makes simultaneously when pointer reaches set point

For further information on switch contacts, see data sheet AC 08.01

## Other versions

- Contact model 821 with separate circuits
- Contact model 821 as change-over contact (break or make simultaneously at the set point)
- Contact model 821 with cable break monitoring (parallel resistance $47 \mathrm{k} \Omega$ and $100 \mathrm{k} \Omega$ )
- Contact materials for contact model 821: Platinum-iridium alloy and gold-silver alloy
- Contacts fixed, without contact adjustment lock
- Contact adjustment lock leaded
- Contact adjustment key fixed
- Connector (instead of cable socket)

## Specifications for instruments with magnetic snap-action contact model 821

| Measuring span | Nominal size | Max. number of contacts | Switching current range I | Switch version ${ }^{1)}$ |
| :---: | :---: | :---: | :---: | :---: |
| $\leq 1.0$ bar | 100, 160 | 1 | $0.02 \ldots 0.3 \mathrm{~A}$ | L |
| > 1.0 bar | 100, 160 | 1 | $0.02 \ldots 0.6$ A | S |
| $\leq 1.6$ bar | 100, 160 | 2 | $0.02 \ldots 0.3 \mathrm{~A}$ | L |
| > 1.6 bar | 100, 160 | 2 | $0.02 \ldots 0.6$ A | S |
| $\leq 4.0$ bar | 100 | 3 or 4 | $0.02 \ldots 0.3 \mathrm{~A}$ | L |
| > 4.0 bar | 100 | 3 or 4 | $0.02 \ldots 0.6$ A | S |
| $\leq 2.5$ bar | 160 | 3 or 4 | $0.02 \ldots 0.3 \mathrm{~A}$ | L |
| > 2.5 bar | 160 | 3 or 4 | $0.02 \ldots 0.6$ A | S |

1) Design of the contact coil: Version " L " = light-weight, version " S " = heavy

The recommended setting range of the contacts is $25 \ldots 75 \%$ of the scale ( $0 \ldots 100 \%$ on request).
Contact material (standard): Silver-nickel, gold-plated

## Setting the contacts

The recommended minimum clearance between 2 contacts is $20 \%$ of the measuring span.
The switch hysteresis is $2 . . .5 \%$ (typical).

| Characteristics | Unfilled instruments |  | Filled instruments |  |

## Specifications for instruments with inductive contact model 831

| Measuring span | Nominal size | Case version | Max. number of contacts |
| :--- | :--- | :--- | :--- |
| $\mathbf{0 . 6}$ bar | 100,160 | S1 | 1 |
| $\mathbf{0 . 6}$ bar | 160 | S 3 | 1 |
| $\mathbf{1 . 0}$ bar | 100,160 | S 1 | 2 |
| $\mathbf{1 . 0}$ bar | 100 | S 3 | 1 |
| $\mathbf{1 . 0}$ bar | 160 | S 3 | 2 |
| $\mathbf{Z 1 . 6}$ bar | 100,160 | $\mathrm{~S} 1, \mathrm{~S} 3$ | 3 |

## Legend:

S1 = Standard version, with blow-out device (per EN 837)
S3 = Safety version, Solidfront (per EN 837)
The recommended setting range of the contacts is $10 \ldots 90 \%$ of the scale ( $0 \ldots 100 \%$ on request).

## Setting of contacts to identical set point

Up to 2 contacts can be set to an identical set point. For a version with 3 contacts this is not possible. The left (no. 1) or right (no. 3) contact may not be set to the same set point as the other 2 contacts. The required displacement is approx. $30^{\circ}$, optionally to the right or to the left.

## Available contact versions

- 831-N
- 831-SN, safety version ${ }^{1)}$
- 831-S1N, safety version ${ }^{1)}$, inverted signal

1) only operate with a corresponding isolating amplifier (model 904.3x)

Permissible temperature ranges

| T6 | $\mathrm{T} 5 \ldots \mathrm{~T} 1$ | $\mathrm{~T} 135{ }^{\circ} \mathrm{C}$ |
| :--- | :--- | :--- |
| $-20 \ldots+60^{\circ} \mathrm{C}$ | $-20 \ldots+70^{\circ} \mathrm{C}$ | $-20 \ldots+70^{\circ} \mathrm{C}$ |

For further information on hazardous areas, see operating instructions.

Associated isolating amplifiers and control units

| Max. switching voltage |  | AC/DC 250 V |  |  |
| Min. switching voltage |  | Not required |  |  |
| Switching current |  | AC/DC 1 A |  |  |
| Min. switching current |  | Not required |  |  |
| Transport current |  | AC/DC 2 A |  |  |
| $\boldsymbol{\operatorname { c o s }} \varphi$ |  | 1 |  |  |
| Switching power |  | 60 W/VA |  |  |
| Contact resistance (static) |  | $100 \mathrm{~m} \Omega$ |  |  |
| Insulation resistance |  | $10^{9} \Omega$ |  |  |
| Breakdown voltage |  | DC 1,000 V |  |  |
| Switching time incl. contact chatter |  | 4.5 ms |  |  |
| Contact material |  | Rhodium |  |  |
| Switch hysteresis |  | 3... 5 \% |  |  |

- The limit values presented here must not be exceeded.
- When using two contacts, these cannot be set to the same point. Depending on the switching function, a minimum clearance of $15 \ldots 30^{\circ}$ is required.
■ The setting range of the contacts is $10 \ldots 90 \%$ of the scale.
- The switching function can be set in manufacturing such that the reed contact will actuate exactly at the required switch point. For this, we need the switching direction to be specified on order.

[^0]:    1) For hazardous areas, the permissible temperatures of the contact model 831 shall apply exclusively (see page 5). These must not be exceeded at the instrument either (for details see operating instructions). If necessary, measures for cooling (e.g. syphon, instrumentation valve, etc.) have to be taken.
    2) Ingress protection IP54 with safety version case and connection location lower back mount.
[^1]:    1) Plus 14 mm with pressure ranges $\geq 0 \ldots 100$ bar
[^2]:    1) Plus 17 mm with pressure ranges $\leq 0 \ldots 60$ bar
